DESIGNED LIKE A **BOOTCAMP**
BACKED BY THE **IIT LEGACY**

From the Director's Desk

"The **Prime Minister** has set a clear vision: India must become the **Global PowerHouse of AI Talent**. This is not an aspiration; it is a national priority. I asked myself: How do we create immediately deployable AI talent?

In 6 months. Immersive Learning. Residential. With High Touch Points and Handpicked!

This program is our answer. It integrates academic rigour from IIT with practical skills imparted by **Industry Leaders** from **Fortune 500** companies. Students study on campus, learn in our labs, build with IIT resources, and graduate with executive alumni status. We are **Ranked 39th in NIRF** are located in **Gandhinagar, near GIFT City, India's emerging AI and Fintech Hub**. We have the infrastructure, the faculty, and the industry connections.

India Needs 1 Million AI Professionals by 2027. We have miles to go before we sleep.

Each Cohort Selects Only 60 Students Based on their Potential. You must earn your place through **Examination and Interview**. If you are ready to commit 6 months fully, we will transform your career trajectory.

Students who are ready to give their best will find every opportunity here to excel and contribute to India's vision of becoming a **Global Leader in Technology and AI.**"

Prof. Rajat Moona

Director, IIT Gandhinagar

Chairman, IIT Gandhinagar Competency Development Foundation

About IIT Gandhinagar

The Indian Institute of Technology Gandhinagar (IITGN), established in 2008, is one of India's youngest IITs and has quickly built a reputation for its student-first philosophy, agile curricula, and bold interdisciplinary research culture. **Ranked #39 in NIRF 2025**, IITGN is located on a **400-acre Eco-Friendly Campus** on the banks of the Sabarmati River, the first academic campus in India to earn a **5-star GRIHA-LD Sustainability Rating**. With state-of-the-art classrooms, innovation labs, and vibrant student life, IITGN offers a truly modern IIT experience where ideas move seamlessly from whiteboards to real-world prototypes.

About IIT Gandhinagar Competency Development Foundation (IITGN CDF)

The IIT Gandhinagar Competency Development Foundation (IITGN CDF) is established under the aegis of the Indian Institute of Technology Gandhinagar to strengthen the bridge between **academic excellence** and **industry application**.

IITGN CDF is envisioned as IIT Gandhinagar's dedicated platform for advancing professional and technical competencies through innovative, hands-on, and industry-aligned programs. These programs, pioneered by IIT Gandhinagar through IITGN CDF, and executed by its operating arm, **Competency Advancement Academy**, bring together the institute's academic rigor, research expertise, and a strong network of industry collaboration to create meaningful pathways for upskilling and talent development.

PG Diploma in AI-ML and Agentic AI Engineering

20 Weeks to Production AI Engineering

Month 1: ML Engineering Foundations → Train & Deploy Models

What You'll Master:

- Python for ML | Statistics | ML Fundamentals | Neural Networks

Tools & Platforms:

- Weights & Biases for experiment tracking, mlflow

Job Competencies Unlocked:

- ML Engineer: Train classification/regression models, explain backpropagation, optimize neural networks, implement gradient descent from scratch

Month 2: Agentic AI Development → Build Intelligent Systems

What You'll Master:

- Deep Learning & Vision | NLP & Transformers | Agentic AI | MLOps

Tools & Platforms:

- Hugging Face Transformers for BERT/GPT models, fine-tuning pipelines

Job Competencies Unlocked:

- Agentic AI Engineer: Build RAG systems, orchestrate multi-agent workflows, fine-tune LLMs for domain tasks, implement tool-using agents with memory and planning

Months 3-4: Production AI Systems → Deploy at Scale

What You'll Master:

- Cloud & Infrastructure | MLOps & Deployment | System Design |
Capstone: Autonomous AI Agent System

Tools & Platforms:

- Kubernetes for orchestration | Terraform

Job Competencies Unlocked:

- Advanced ML/AI Engineer: Design agent architectures, deploy production AI systems, implement A/B testing for models, monitor model performance, build fault-tolerant pipelines

Month 5: Interview Excellence → Land Top AI Roles

What You'll Master:

- 300+ ML coding problems | Algorithm implementation from scratch | System design for ML | 15+ mock interviews

Tools & Platforms:

- Papers with Code for research implementation challenges

Job Competencies Unlocked:

- FAANG-Ready: Code neural networks from scratch, design recommendation systems at scale, explain trade-offs in model selection, architect real-time ML systems

Throughout 20 Weeks: Competitive Edge

- Daily ML algorithm practice, Kaggle competitions, AI ethics discussions, open-source contributions

Graduate Ready For: ML Engineer | Agentic AI Engineer | Applied AI Researcher | MLOps Engineer

PG Diploma in GenAI-Powered Data Science & Engineering

20 Weeks to Production Data Science

Month 1: Data Engineering Foundations → Query & Model Data

What You'll Master:

- SQL & Data Modeling (6c | Python for DS | Statistics | ML Fundamentals)

Tools & Platforms:

Job Competencies Unlocked:

- Data Analyst: Write complex SQL queries with joins/subqueries, perform exploratory data analysis, build classification/regression models, communicate insights with visualizations

Month 2: GenAI-Powered Analytics → Automate Insights

What You'll Master:

- Advanced ML & Deep Learning | Time Series | BI & Visualization | GenAI for DS

Tools & Platforms:

Job Competencies Unlocked:

- Data Scientist: Build neural networks for NLP/computer vision, forecast business metrics, create executive dashboards, generate automated insights with GenAI

Months 3-4: Production Data Products → Deploy ML Systems

What You'll Master:

- Big Data & Streaming | Cloud Data Platforms | Performance Optimization | Capstone: End-to-end ML Pipeline

Tools & Platforms:

Job Competencies Unlocked:

- Advanced Data Scientist / Analytics Engineer: Design end-to-end ML pipelines, implement A/B testing frameworks, deploy models to cloud, present ROI to stakeholders

Month 5: Interview Excellence → Land Top DS Roles

What You'll Master:

- 200+ SQL problems | ML coding challenges | Business case studies | System design for ML | 15+ mock interviews

Tools & Platforms:

- Case study frameworks: product metrics, A/B testing, experimentation design

Job Competencies Unlocked:

- FAANG-Ready: Solve SQL optimization problems, design metrics for products, explain statistical significance, architect scalable data systems

Throughout 20 Weeks: Competitive Edge

- Daily SQL practice, Python DSA, Kaggle competitions, data ethics discussions, product thinking for analytics

Graduate Ready For: Data Scientist | ML Engineer | Analytics Engineer | BI Developer

PG Diploma in AI Driven Cloud Based Software Development

20 Weeks to Cloud-Native Software Engineering

Month 1: Backend Engineering Foundations → Build Scalable APIs

What You'll Master:

- Python/Java Programming | DSA | System Design | Git & Testing

Tools & Platforms:

Job Competencies Unlocked:

- Backend Engineer: Solve DSA problems, design RESTful APIs, implement authentication/authorization, write clean testable code following SOLID principles

Month 2: AI-Powered Full-Stack Development → Build Intelligent Apps

What You'll Master:

- Full-Stack Development | Backend Engineering | AI Integration | GenAI Tools

Tools & Platforms:

Job Competencies Unlocked:

- Full-Stack Engineer: Build end-to-end applications, integrate LLMs into products, create responsive UIs, implement real-time features, design database schemas

Months 3-4: Cloud & DevOps Mastery → Deploy at Global Scale

What You'll Master:

- Databases & Caching | Cloud & DevOps | System Design | Testing & AI Integration | Capstone: Production SaaS

Tools & Platforms:

Job Competencies Unlocked:

- Advanced SWE / DevOps Engineer: Design microservices architectures, deploy to cloud platforms, implement CI/CD pipelines, scale systems to millions of users, monitor production systems

Month 5: Interview Excellence → Land Top SWE Roles

What You'll Master:

- 300+ DSA problems | System design for distributed systems | 15+ mock interviews | Behavioral prep

Tools & Platforms:

- System design platforms: Designing   NETFLIX Uber scale systems

Job Competencies Unlocked:

- FAANG-Ready: Solve hard DSA problems efficiently, design systems handling millions of requests, explain CAP theorem trade-offs, architect fault-tolerant distributed systems

Throughout 20 Weeks: Competitive Edge

- Daily DSA practice, code optimization challenges, system design discussions, open-source contributions, tech blog writing

Graduate Ready For: Software Engineer | Full-Stack Engineer | Backend Engineer | DevOps Engineer | Cloud Architect

Projects & Case Studies

PG Diploma in

AI-ML & Agentic AI Engineering

Portfolio Projects

Sample Projects and Case Studies

Multi-Agent Financial Intelligence System

Deliverables:

- Live web dashboard showing agent reasoning chains, confidence scores, source citations
- API endpoints handling 100+ concurrent requests with <3s response time
- Evaluation report: 15+ metrics comparing 3 different agent architectures on 500 test cases
- Technical documentation: Architecture diagrams, agent state machines, API specs, deployment runbooks
- Video demo showcasing system handling 5 complex financial queries end-to-end

Tech Stack

Other Notable Projects

- Create Your Own Autonomous Airline Trip Concierge Using Interruptible Agentic AI
- Build a Multi-Agent Software Company That Ships Code From One-Line Prompts
- Design a Self-Evolving Customer Support Mesh With RAG-First Intelligence
- Construct a Multi-Agent Marketing Brain That Generates, Critiques & Deploys Campaigns
- Deploy a Self-Healing Knowledge-Ops Engine That Updates Documentation Automatically
- Build an AI-Powered QA Guild That Tests, Breaks & Fixes Apps Autonomously

PG Diploma in

GenAI-Powered Data Science & Engineering

Portfolio Projects

Sample Projects and Case Studies

Real-Time E-Commerce Data Platform

Deliverables:

- Live streaming pipeline processing synthetic e-commerce events (1M+/day) with <2 min end-to-end latency
- Data warehouse with 10+ dimensional models, 50+ dbt-managed tables, automated daily refreshes
- Operational dashboard: Pipeline health, data quality scores, cost metrics, SLA compliance
- Natural language query interface powered by LLM + text-to-SQL, tested on 100+ business questions
- Technical documentation: Data dictionary, pipeline SLAs, disaster recovery runbooks, cost optimization analysis

Tech Stack

Other Notable Projects

- Build India's First Self-Correcting Retail Demand Brain
- Real-Time Price Elasticity Engine for Tier-2 Commerce
- UPI Fraud Graph with Autonomous Signal Extraction
- Streaming Revenue Forecasting Fabric for D2C Brands
- Geo-Spatial Urban Expansion Predictor for Mobility Startups
- LLM-Augmented Credit Underwriting for MSMEs
- Operational Load Predictor for India's Power Grids
- DocIntel AI Risk Extractor for Bank & GST Docs
- Customer Lifetime Economics Simulator for OTT
- Hyperlocal Food Delivery Demand Orchestrator

PG Diploma in

AI Driven Cloud Based Software Development

Portfolio Projects

Sample Projects and Case Studies

AI-Powered SaaS Platform for Content Moderation

Deliverables:

- Live web application with admin dashboard, moderation queue, analytics, and appeal handling
- REST APIs with OpenAPI docs, rate limiting (1000 req/min), JWT auth, 99.9% uptime
- AI moderation system achieving 92%+ precision/recall on test set of 10K+ labeled examples
- Load testing results: System handles 500 req/sec with p95 latency <300ms
- Observability dashboards: Service health, API metrics, model performance, cost per moderation (\$0.02 target)
- Complete technical documentation: Architecture diagrams, API specs, deployment guides, DR plan, security audit

Tech Stack

Other Notable Projects

- Architect a Netflix-Scale Microservices Backbone With Event-Driven Workflows
- Build an AI-Enhanced SRE Command Center With Automated Incident Narratives
- Create a Real-Time Collaborative Editor With CRDT Sync & AI Summaries
- Design a Multi-Region E-Commerce Backend With Sagas & Circuit Breaking
- Construct a Cloud-Native Observability Lake With Intelligent AIOps Layer
- Build a Secure Payments Clearing Engine With Message Queues & Retry Logics

Pathway to the AI Skills Employers Want

The First of its Kind Bootcamp Style Immersive **PG Diploma Program** that Integrates
Authentic In-campus IIT Rigour with Industry-led Latest AI and Tech Skilling

600+ HOURS

150 HOURS

LEARN

Gain Deep Mastery of Core Concepts required for your future job roles through an immersive flipped-classroom learning model with expert guidance.

200 HOURS

APPLY

Learn to solve RFPs, articulate complex problems clearly, and apply design thinking frameworks with structured code walkthroughs and detailed reviews.

150 HOURS

EXECUTE

Build, deploy, and launch production-grade applications using modern GenAI tools and AI agents with hands-on, end-to-end practical workflows.

100 HOURS

EVIDENCE

Develop a standout GitHub portfolio through real projects, 10+ validated product ideas, personal branding, and over 100 solved coding problems.

NOT JUST PASSIVE CONCEPT LEARNING

Designed to Extract the Best in You

Extensive Projects and Product Portfolio Building

6+ Hours of Hands-on Application Every day

Mentorship from Top IIT Faculty and Leading Deep Tech Experts from Industry

100% Placement Support*

Extensive hours of Mock Interviews

Build and Present Product Ideas in Ideas Lab

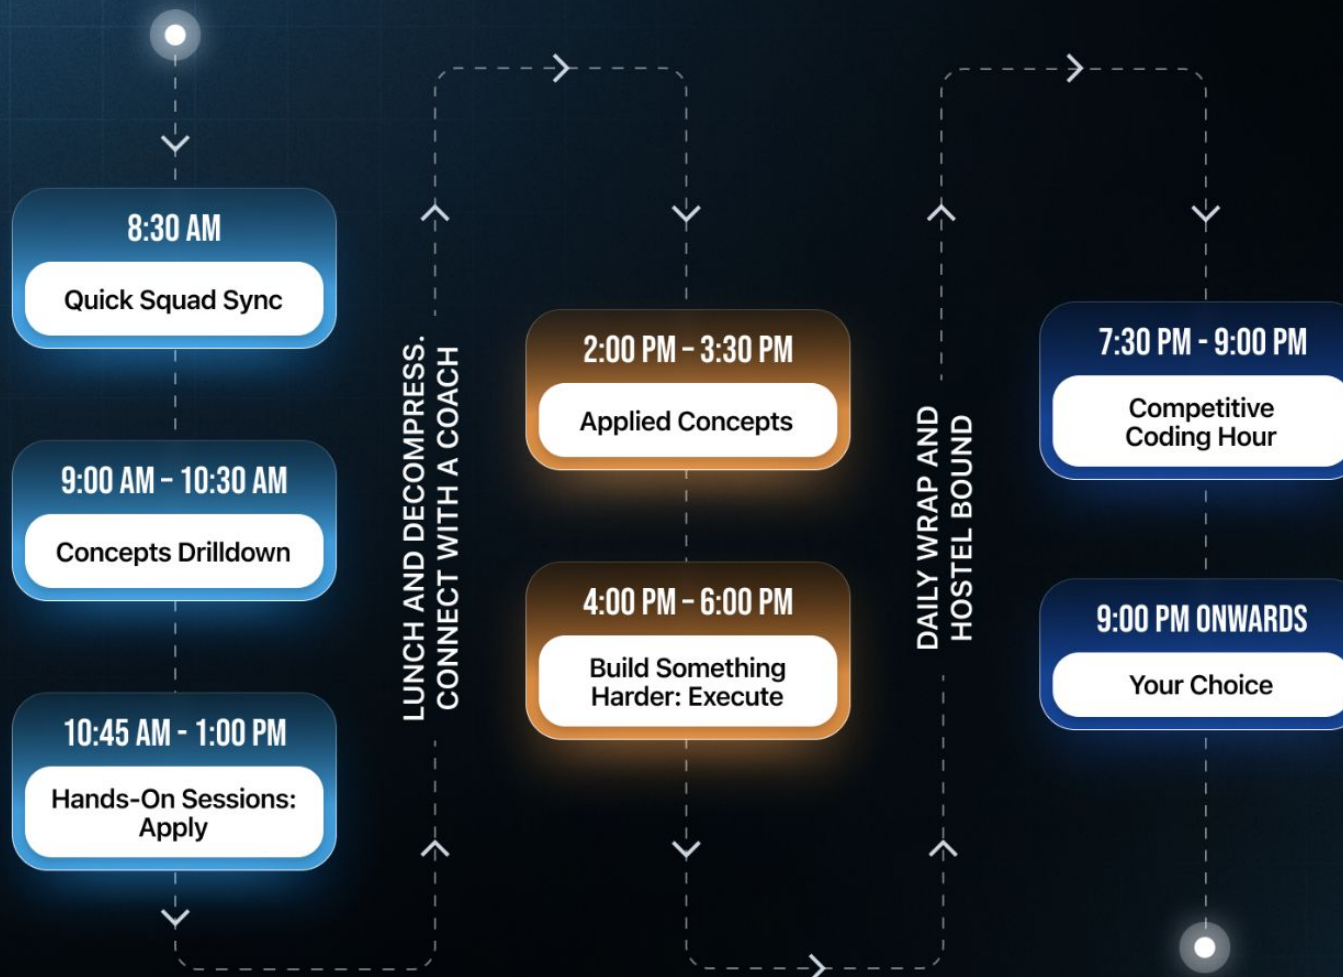

Daily Competitive Coding Challenges

*For participants with consistently 7+ CGPA

Your Daily Schedule

What a Typical Day Will Look Like

Other Events In a Typical Week

FOCUS FIERCELY

- Weekly Assessments
- Lab Hours (IIT Lab Visits)
- Weekly Coding Tournaments
- Weekly Placement Sessions
- All Nighter Sprints (Night Owl's Zone)
- Pitch and Present
- Demo Days

UNWIND FULLY

- Leaderboard Winners of the Week
- Sports Time
- Clubs and Events
- Friday Social Nights
- Talent Hunt Nights
- Monthly Lunch with Leaders
- Industry Leader Sessions

*Representative schedule, may change based on faculty discretion

What you Graduate With

Skills. Credibility. Legacy. And Memories of Once in a Lifetime

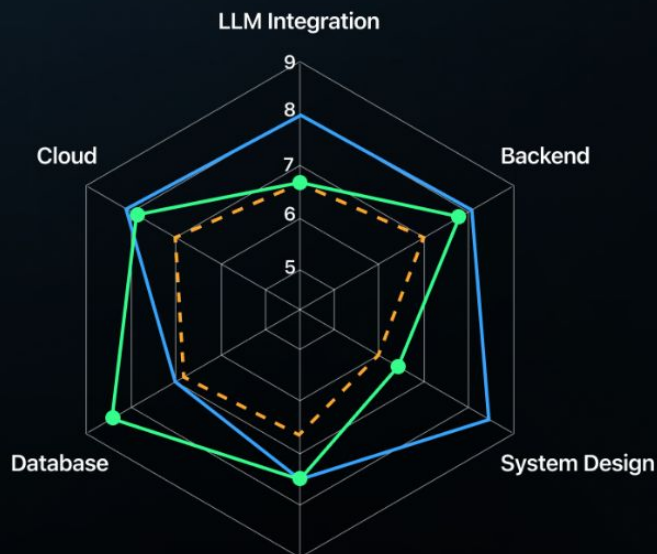

- ✓ PG Diploma jointly awarded by IIT Gandhinagar and CAA
- ✓ Executive Alumni Status
- ✓ IIT Gandhinagar Email and Id Card
- ✓ Access to IIT Network as well as ability to network with students and faculty on campus
- ✓ Fellow IIT Professionals with Executive Alumni Status
- ✓ Fortune-500 Mentors
- ✓ 100% Placement Support*
- ✓ Skills equivalent to 2 years of work experience
- ✓ Industry Connections
- ✓ Kickstart an Accelerated Career

Technical Proof

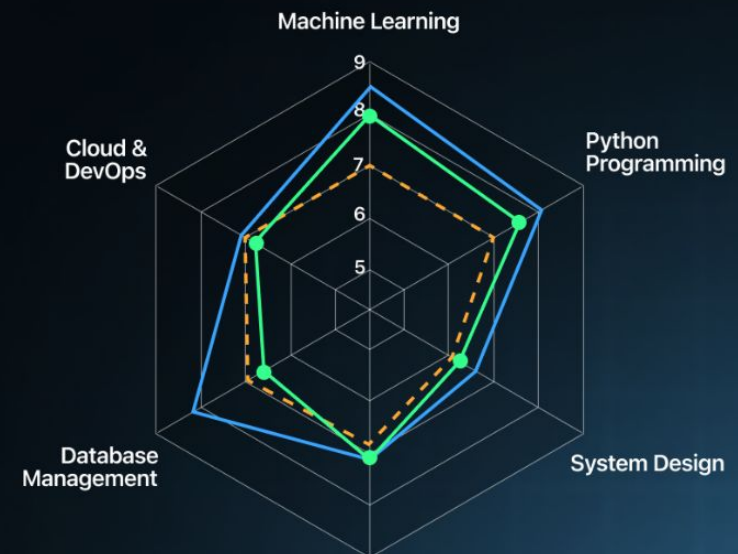

- 15-20 Deployed Projects
- 200+ GitHub Commits
- Portfolio Website
- Industry Certifications

*Students need to maintain a consistently CGPA of 7+ consistently to be eligible for this

Your Skills Mapped to Best Fit Job Roles

Job Role 1: Full-Stack AI Developer (60% fit - Moderate gaps in LLM & Cloud)

Job Role 2: Backend Engineer (78% fit - Better alignment skill profile)

100% Placement Support

Month 1 Onwards

Topics

- Competitive Coding Practice
- Ideas Lab:** Build Ideas, Deconstruct Existing Products, Execute and Present
- GitHub Portfolio Building:** Stack Up Full-Scale Projects
- Leadership Sessions on Real World Workflows and Best Practices

Month 3 Onwards

Topics

- Placement Assessment and Coaching Every Week
- Mock Interview and Feedback Every Week
- Job Role Specific Coaching and Mentoring with Industry Experts

Month 4 Onwards

Topics

- Resume Building
- LinkedIn Optimization
- Placement Interviews

Build an Impressive Portfolio

GitHub

AI/ML & GenAI Focus

- Architect end-to-end pipelines (LoRA/QLoRA, MMLU metrics).
- Publish reproducible notebooks & interactive demos (Gradio/ Streamlit).

SWE & Cloud Focus

- Build scalable microservices (Domain-driven, Airflow, SLA).
- Implement robust, documented APIs (REST/ gRPC, Docker/K8s).

Stack Overflow & Community

Technical Authority

- Contribute domain-specific answers (AI/ML, Cloud, SWE).
- Build a public reputation & profile.

Knowledge Sharing

- Document & share unique solutions (Dev.to, Medium).

LinkedIn

Professional Brand

- Craft a strong profile highlighting skills, project, and the PG Diploma.

Networking

- Connect with alumni, mentors, and industry leaders in your target domain.

Content Strategy

- Share project updates, insights, and learning journey posts.

Competitive Programming

Algorithmic Mastery

- Achieve high ranks (4-star+) in long challenges: demonstrate deep analysis.
- Master complex DSA (graphs, DP, advanced trees).

Performance Optimization

- Analyze & optimize code for time/space complexity (C++, Python).

Your Gateway to the Best Companies

Company Categories

Here is a list of companies that recruit from IIT programs, including,

GLOBAL CAPABILITY CENTERS

PRODUCT COMPANIES

STARTUPS

CONSULTING

Eligibility Criteria for Placement

- 7.0+ CGPA Maintained throughout the program
- 95%+ Attendance Consistent attendance required
- 12+ Projects Deployed with live links

*Conditions Apply

Companies Trust the IIT Filter

- They've hired from IITs for 60 years. Now you're inside it.
- The IIT Gandhinagar badge will open up locked doors for your career.

A Campus That Transforms You

As a resident student, you will experience the best educational resources in the country, in the IIT Campus and build a network with a top-tiered faculty and students

Green Campus

A plethora of green initiatives are being undertaken in the campus

Smart Campus

A wide range of innovative technologies have been implemented to make an intelligent campus

Free & Open Campus

The institute philosophy allows all kinds of new initiatives & experiments

Interactive Campus

The campus has been designed to foster interdisciplinary and interbatch interactions

Live the IIT Life

Join competitions and Hackathons

Participate in Club activities

Sports Events

Experience the IIT Events and Fests

Compete on the Sports Grounds

Your Hostel

As a full time resident student, you will live in the IIT residency.

- Twin shared rooms
- Access to medical, laundry, grocery and other facilities
- Access to campus shuttles
- All-nighter sprints, talent hunts and other events in hostels
- 4 Meals in the campus mess

*Conditions Apply

What Sets This Apart

Dimension	CAA Residential PG Diploma	Typical Programs from Other Top Institutes
Learning Mode	Live on IIT campus for 6 months	Learn from home via laptop
Time Model	Full-time intensive bootcamp	Part-time alongside your job
Contact Hours	600+ hours (4x industry standard)	150-300 hours
Project Portfolio	15-20 deployed, live applications	3-5 theoretical capstone projects
Coding Rigor	100+ competitive problems (daily practice)	Self-paced optional exercises
Industry Exposure	Live problem-solving, masterclasses and mentorship from Fortune 500 leaders	Occasional guest webinars
Credential	IIT Gandhinagar Executive Alumni + PG Diploma	PG Diploma/Certificate
Selection Process	Competitive exam + panel interview	Profile-based application review
Exclusivity	60 seats, invitation-only	Open enrollment (post-eligibility)
Assessment Style	Weekly sprints + continuous performance tracking	Mid-terms + end-term exams
Outcome Window	6 months → job market readiness	12-18 months → gradual transition

SAMPLE CERTIFICATE

AI Clinic

Where Classroom Learning Meets Real-World Execution

The AI Clinic is a unique initiative that enables learners to immerse themselves and gain hands-on experience with AI-driven systems and tools. This approach is similar to how medical professionals develop real-world skills while working in a hospital or clinic in organizations from Day 1.

What Happens Inside the AI Clinic?

- **Live No Code Enterprise Projects:** Work on real business challenges sourced from Futureense's industry network, across marketing automation, financial forecasting, and workflow transformation.
- **AI Workflow Design and Implementation Roadmaps:** Learn to design, automate, and optimize AI-first business systems, mirroring how global enterprises deploy Generative and Agentic AI frameworks.
- **Tool Mastery in Action:** Get hands-on experience with 30+ leading AI and automation tools, from ChatGPT, Claude, and Zapier to Looker Studio, LangChain, and GitHub Copilot.
- **Guided Mentorship:** Receive one-on-one feedback from industry mentors and program faculty who review your project's AI strategy, implementation logic, and measurable ROI.

Why Does It Matter?

While most programs end with case studies, this one ends with proof of execution. Your AI Clinic projects become part of your career portfolio, demonstrating your ability to lead and deliver AI-led business outcomes, a differentiator that sets you apart in the talent market. This is where ideas become impactful, and managers become execution leaders.

**NOT JUST TEACHING
WE TRANSFORM HOW YOU THINK**

Ideas Labs

Throughout the program, test startup ideas using skills you're learning. Not mandatory. But if you're entrepreneurial, this is your launchpad.

Ideate

Pitch weekly. Get feedback. Test and iterate rapidly.

Build MVPs

Use AI tools to build working prototypes. Test with users.

Pitch & Fund

Present to VCs + founders. Best ideas get incubation support.

Breakfast Club

Not Just the Program Journey - We Support You Even When You Graduate

Futureense Breakfast Club is an alumni network of all Futureense learners, who continue to learn, collaborate, and grow together even after completing the programs.

You become part of a tribe that never stops evolving!

What You Get as a Member

01

Access the Futureense Alumni Network

02

Join Monthly Career Webinars

03

Get Referral & Member Benefits

04

Earn Recognition & Rewards

05

Learn Continuously & Collaborate

Why It Matters?

The Breakfast Club is designed specifically to ensure that learning and growth never stop! Even after graduation, you'll remain part of a network of AI-ready leaders influencing businesses, startups, and enterprises across industries.

- **A Community That Grows With You!**

Eligibility Criteria for Admission

- At least **70% or 7.0 CGPA** in Class 12th
- B.Tech / B.E. / B.S. (4-year) with **minimum 50% marks or 5.0 CPI/ CGPA** (on a 10-point scale) OR
- M.Sc., MCA, Integrated M.Sc./ M.Tech, BS-MS (5-year programs) with **minimum 50% marks or 5.0 CPI/CGPA**.
- **Minimum > 60% or > 6.0 CGPA** in completed previous semesters with no backlogs (for 8th Semester students)

Who Gets In?

THE CHOSEN 60

This program is for those who are hungry to learn, passionate, and have enough grit to work hard and get 2 years of work experience in 6 months.

For those who want to experience 6 months of high-impact IIT campus life.

For those who want **IIT's Executive Alumni Status and an Exclusive IIT Residential Campus Life.**

YOU ARE:

- A final year student or a fresh graduate
- Building or scaling a business
- Ready to outwork everyone
- Ready to land a role at a top company
- Currently earning *3-7L job roles & aspiring for ₹8L+ technical roles & be AI-ready
- Want IIT network access
- Need the latest technical fluency

Additional requirements:

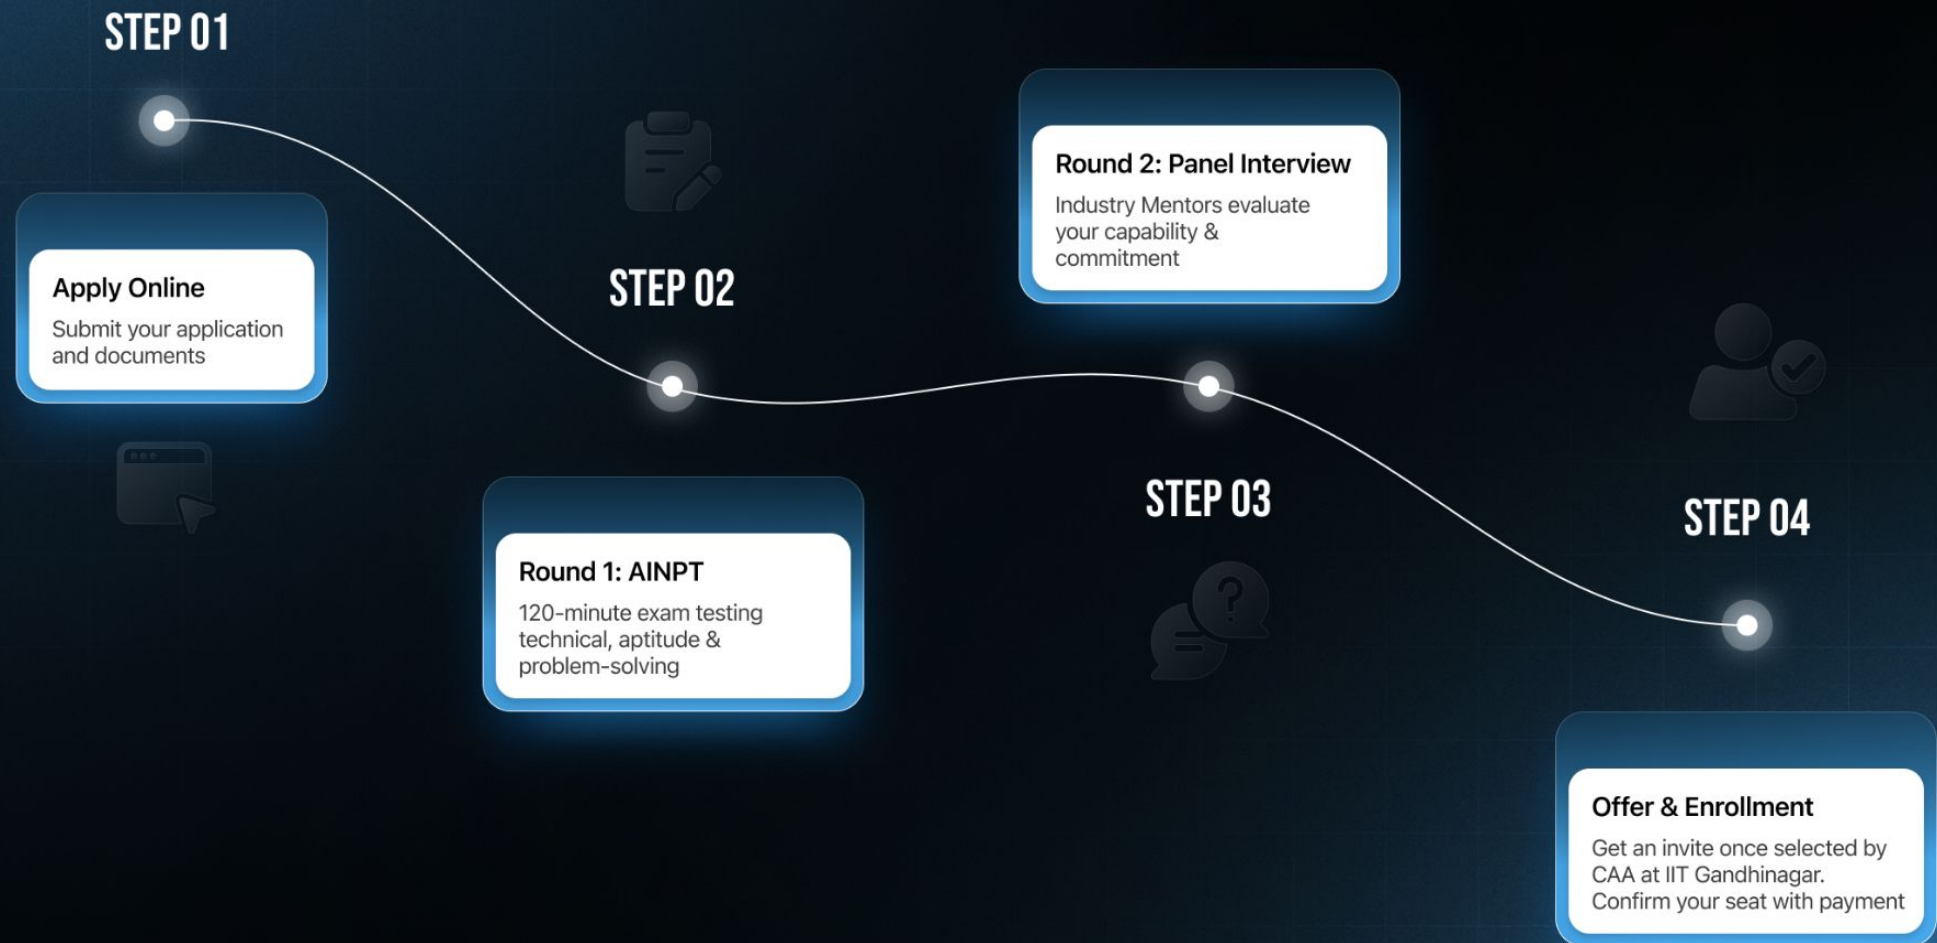

- Proficiency in at least one programming language.
- Understanding of basic statistics and mathematics.
- Excellent written and spoken communication.

Open to

**8th Semester B.Tech/B.E. Students | Fresh Graduates
& Early Professionals (0-2 years experience)**

Application Process

This is not open enrollment. You must pass a rigorous examination and interview to earn your seat.

*Visit www.iitgncdf.com for more information on AINPT Test

Program Investment

₹5,00,000 (all inclusive)

Tuition Fees

(500+ hours, IIT faculty, grading, transcript)

Payable To IITGN CDF

₹1,25,000 + 5% GST

Hostel & Operations Fees

(Hostel, meals, labs, admin for 6 months)

*Non refundable

₹3,000

Application Fee (Pre-test)

*Non refundable

Payable To Futureense

EMI Options Available*

This is an invitation-only program, and the application process will close once 60 seats are enrolled.

Important dates

- Program Start Date: **23rd Feb 2026**
- Last Date for Fees Payment: **31st Jan 2026**

* Futureense is the Industry, Admissions and Hospitality Partner

About Futureense

Futureense is **India's Fastest-growing AI-skilling Company**, dedicated to accelerating India's role in global AI development.

Our mission is to **scientifically map AI talent demand** and **create scalable, industry-aligned upskilling models** that equip Indian professionals with **cutting-edge capabilities**.

By integrating **real-world applications** with **academic excellence**, we are **building tomorrow's leaders** across every possible funnel, shaping the talent that will define tomorrow.
